PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience designing and deploying scalable MERN stack and PostgreSQL-based applications across internships and freelance engagements. Proficient in React.js, Node.js, Express.js, MongoDB, PostgreSQL, Redis, REST API development, and cloud integrations. Demonstrated ability to contribute to AI-powered production systems, optimize backend performance, and collaborate in Agile teams. Strong problem-solving foundation with 300+ DSA problems solved in Java.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3
Frontend Technologies: React.js, React TypeScript, Tailwind CSS, Material UI (MUI), Web3Forms, Responsive Design
Backend Technologies: Node.js, Express.js, REST API Development, Middleware, Authentication (JWT)
Databases: MongoDB, PostgreSQL, SQL, PL/SQL, Redis (Caching)
Cloud & Deployment: AWS Lambda, Cloudinary, Vercel, Production Deployment
Tools & Platforms: Git, GitHub, Bitbucket, Postman, VS Code
Practices: Agile Methodology, RESTful API Design, Performance Optimization, Version Control

EXPERIENCE

Software Developer Intern Nov 2025 – Mar 2026
Erino.io (AI-Powered CRM Platform) **Onsite, Bangalore**
– Engineered scalable, production-ready features for an AI-based CRM application using Node.js, Express.js, PostgreSQL, React.js, and Material UI, directly improving system reliability and user experience.
– Designed and implemented RESTful APIs for customer data management, user authentication (JWT), and workflow automation, reducing manual processing overhead.
– Optimized backend performance using Redis caching strategies, decreasing API response times and improving overall system throughput for concurrent users.
– Architected and delivered end-to-end call analysis functionality spanning frontend, backend, and AWS Lambda, enabling AI-driven recommendations to enhance sales team decision-making and increase deal closure rates.

Full Stack Development Intern Jun 2025 – Aug 2025
Codeon Technologies **Remote**
– Developed and maintained responsive, cross-browser-compatible web components using React.js and Tailwind CSS, improving frontend consistency and user interface quality.
– Built RESTful APIs using Node.js and Express.js for property and user management modules, enabling efficient data exchange between frontend and backend services.
– Collaborated in a 5-member Agile team, leveraging Git and GitHub for version control, code reviews, and feature branch management to ensure streamlined delivery.

Freelance Full Stack Developer **Self-Employed**
FrameCraft – Local Business Website **Remote**
– Independently scoped, developed, and deployed a complete production website for a local retail client, managing the full software development life cycle from client requirement gathering to deployment.
– Delivered a fully responsive frontend and backend system, coordinating with remote team members via collaborative workflows to meet client design expectations and delivery milestones.

PROJECTS

Doctor-Patient Connect | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs* Team Project
– Designed and built a responsive full stack web application enabling patients to discover and connect with doctors based on reported symptoms, leveraging a symptom-matching algorithm.
– Developed secure RESTful APIs for user authentication and patient record management, ensuring data integrity and role-based access control across user types.

Blood Donation Management System | *React.js, Node.js, Express.js, MongoDB, Cloudinary* | [Live](#) | [GitHub](#)
– Architected a 3-role application (Donor, Organizer, Admin) to manage campus-wide blood donation events, improving coordination and operational efficiency for donation campaigns.
– Implemented secure donor registration with image upload integration via Cloudinary API and deployed the application to a production environment accessible via live link.

EDUCATION

Rajiv Gandhi University of Knowledge and Technologies

B.Tech in Computer Science Engineering | CGPA: 8.6 / 10

Rajiv Gandhi University of Knowledge and Technologies

Pre-University Course | CGPA: 9.4 / 10

Jul 2022 – Jul 2026

Andhra Pradesh, India

Jul 2020 – Jul 2022

ACHIEVEMENTS & CERTIFICATIONS

- **Hackathon Winner** – Sree Venkateswara University, Tirupati (Apr 2025): Doctor Patient management prototype using the MERN stack, securing 1st place.
- **LeetCode**: Solved 300+ problems spanning Arrays, Trees, Graphs, and Dynamic Programming in Java.
- **Postman Student Expert** – Let's Upgrade (2024)
- **Git and GitHub Essentials** – Let's Upgrade (2024)
- **Java Fundamentals** – Udemy (2024)
